

BATTEY SWAP

UNLIMITED RANGE. CONTINUOUS OPERATION.

With Zbee you now have the opportunity to avoid standing and waiting for the vehicle to be charged. With our efficient Battery Swap System you will be able to drive your vehicle continuously and with little or no downtime at all.

A Battery Swap Zbee has room for two batteries and can run about 25km/battery before switching it in the charging station.

The batteries weigh only 12kg and contain 1.5kWh of energy, which means that the swap goes really fast.

All to optimize up-time on the vehicle.
